

Karyopharm Therapeutics to Participate in Upcoming Investor Conferences

NEWTON, Mass., May 31, 2017 (GLOBE NEWSWIRE) -- Karyopharm Therapeutics Inc. (Nasdaq:KPTI), a clinical-stage pharmaceutical company, today announced that Michael Kauffman, MD, PhD, Chief Executive Officer, will participate in the following upcoming investor conferences:

- The Jefferies 2017 Global Healthcare Conference on Tuesday, June 6, 2017 at 9:00 a.m. ET in New York.
- The JMP Securities Life Science Conference on Tuesday, June 20, 2017 at 2:00 p.m. ET at the St. Regis Hotel in New York.

A live webcast of the Jefferies presentation will be available on the "Events & Presentations" page in the Investors section of the Company's website at <http://investors.karyopharm.com/events.cfm>. A replay of the Jefferies webcast will be archived on the Company's website for 30 days following the presentation.

About Karyopharm Therapeutics

Karyopharm Therapeutics Inc. (Nasdaq:KPTI) is a clinical-stage pharmaceutical company focused on the discovery and development of novel first-in-class drugs directed against nuclear transport and related targets for the treatment of cancer and other major diseases. Karyopharm's SINE™ compounds function by binding with and inhibiting the nuclear export protein XPO1 (or CRM1). The Company's initial focus is on seeking regulatory approval and commercialization of its lead drug candidate, oral selinexor (KPT-330). To date, over 2,000 patients have been treated with selinexor and it is currently being evaluated in several mid- and later-phase clinical trials across multiple cancer indications, including multiple myeloma in combination with low-dose dexamethasone (STORM) and backbone therapies (STOMP), diffuse large B-cell lymphoma (SADAL), and liposarcoma (SEAL), among others. Karyopharm will soon be initiating a pivotal randomized Phase 3 study of selinexor in combination with bortezomib (Velcade®) and low-dose dexamethasone (BOSTON) in patients with multiple myeloma. In addition to single-agent and combination activity against a variety of human cancers, SINE™ compounds have also shown biological activity in models of neurodegeneration, inflammation, autoimmune disease, certain viruses and wound-healing. Karyopharm, which was founded by Dr. Sharon Shacham, currently has five investigational programs in clinical or preclinical development. For more information, please visit www.karyopharm.com.
